RTS Introduction

Reliability Testing Services, LLC is a leading provider of Reliability and Predictive Maintenance (PdM) Services utilizing multiple inspection technologies and maintenance strategies. Our objective is straight forward - Provide **Quality Services with Honesty and Integrity**. Our experienced, ISO certified technicians are spread throughout the country, so we are always nearby. Currently, we are monitoring plant assets at 100+ locations across the US. Our proven suite of Reliability and Predictive Maintenance services will inform you of which assets have problems, what those problems are, the severity of the problem and the rate that they are developing. With this comes recommended Maintenance actions, allowing you to prioritize your Maintenance activities and optimize the use of your limited Maintenance resources to mitigate unplanned downtime and its associated costs.

Improve Plant Reliability with our Condition Monitoring Services

- Vibration Analysis
- Infrared Thermography - Electrical & Mechanical
- Motor Current Evaluations - Offline
- E-Max Motor Testing - Online
- Ultrasonics - Mechanical and Electrical
- Lubrication Oil Analysis
- Optical Gas Imaging
- Onsite Balancing & Laser Alignment
- PdM Program Augmentation
- PdM Assessments
- Vibration Analysis Training & Certification
- Infrared Thermography Training & Certification
- Motion Amplification*
- Operational Deflection Shape Analysis*
- Modal Analysis*

*Services provided by Applied Technical Services - parent company of RTSI

Reliability Consulting Services*

- Mechanical Integrity
- Reliability Engineering
- Root Cause Failure Analysis
- Metallurgical Failure Analysis
- Program Gap Analysis
- Design and Installation Specification
- Professional Training Services
 - Practical Plant Failure Analysis
 - Condition Monitoring Techniques
 - Workforce Development
 - Failure Elimination
 - Onsite Bearing Failure Analysis
 - Customer Specific Classes

*Services provided by Applied Technical Services - parent company of RTSI

Stop the Unplanned Downtime

Reliability Testing Services understands your goals to prevent mechanical and electrical failures, and the costs associated with unplanned downtime. Let Reliability Testing Services, LLC predict and prevent impending failures - determining which machines have problems, what those problems are and how quickly they are developing, allowing you to prioritize your Maintenance activities.

Reliability-Based Program Partnerships

Reliability Testing Services, LLC does more than just service our customers, we seek to partner with them. We know that with your process expertise and our Reliability & Predictive Maintenance services, that together we can develop an effective, balanced Reliability Program to create a safe production environment, minimize downtime and provide high process equipment availability.

Improve Maintenance Utilization

Both shrinking head count and retiring, experienced personnel are having a negative impact on industrial Maintenance resources. Reliability Testing Services, LLC delivers actionable Maintenance information to help you make informed decisions that will allow you to operate in a planned environment with the Maintenance resources you have.

PdM Assessments – Know Where You Are

If a PdM program is in its infancy or developing in maturity, periodic assessments of its People, Processes and Technologies is important for continued development and sustainability. We understand your goal of developing an optimal PdM program, but how do you get there if you don't know where you're starting from? Reliability Testing Services, LLC can help assess your current Predictive Maintenance program and develop a plan to address key areas that need improvement. Once we help establish where you are, we can all move forward together to achieve your goal – Optimal Plant Reliability.

Reliability Engineering Consulting Services

Through our parent company Applied Technical Services, LLC (ATS), Reliability Engineering Consulting Services are available to be leveraged to help optimize your production processes. Reliability of your assets is essential to remain competitive in today's economic climate. ATS's services will assess and address your production issues with a goal of improved safety, product quality, productivity, and efficiency. Contact us to be connected with one of ATS's Reliability Engineers and discuss the needs of your specific situation in more detail.

Mechanical Integrity Consulting Services

Mechanical Integrity Consultation is a core capability of Applied Technical Service, LLC (ATS), our parent company. Their experience allows the support of our customer's efforts to ensure compliance to applicable API and OSHA codes, regulations, and standards. ATS's Reliability Engineers inspect and review documentation, equipment, and operational conditions in both fixed and rotating equipment. Contact us to be connected to the ATS Mechanical Integrity Engineers so that collectively we can discuss your professional needs.
